

What your future holds...

How did you realize you had psychic ability? My family was always open to it, so growing up it was always part of my life. I studied parapsychology, astrology, self-help research and hypnosis. I have a passion and a gift from God, so I have spent my life developing my ability.

Who made a difference in your life? My brother Michael, who died in 1992. I learned through his passing how valuable our time is here in this body. I no longer let fear stop me and have learned to push past my comfort zone. When I reach the end of my life, I want to look back and know there were no would have, could have, should have.

What do you think about life in Arizona? There is not a lot to do here if you are not in a relationship and don't go to bars. Many people come here to clear away old issues. It's more like a place to go to, to get away from the action.

I can see past events, present, and future, and I can tune into people or animals that have crossed over.

Personal Information: Born in Cleveland, OH. Single, three kids. Lived in Los Angeles for 20 years. Currently live in AZ.

Profession: Clairvoyant and psychic consultant for 22 years. Scottsdale Medical and Professional Center, 7350 E. Stetson Drive, Suite 117.

What does your ability allow you to do? I can see past events, present, and future, and I can tune into people or animals that have crossed over. I can also see into the body and see health issues in people and animals.

Exactly what is your vision? I say a prayer to God asking for clarity and guidance for the person I am about to read. I then see a "film" of the person I'm reading in their everyday life.

How do you guide people? I try to make a difference by pointing out any patterns or issues I see that may be keeping them stuck. I can assist them in living a life of purpose. I can see outcomes of areas of their life such as career, relationships, health, moves and travel so they can know what's ahead and then focus more on the present.

Do you tell people when you see bad things? If it is appropriate, depending on the person or situation. I usually do not see things that that person is not supposed to know.

When you are having a regular conversation with someone are you constantly reading him or her? Sometimes. However, I can turn it on and off like a switch.

Do you use your psychic ability in your own relationships? In a way, yes, but not with the detail I get for clients. I have to trust my intuition and believe that there is a higher power running the show. If I have to ask if someone is betraying me, then I shouldn't be with that person. Psychics usually cannot read themselves or use their ability for financial gain. For example, picking winning lottery numbers. If we did, none of us would be of service. We'd be gambling.

PSYCHIC

"I highly recommend Carrie. She has guided me extremely well over the past few years," - Kerri Hawkins, Publisher

What do you think about business in Arizona? I have a huge client base here, but fifty percent of my business is with clients I talk to over the phone who are in other parts of the U.S. I have clients in Canada and a few Europeans. I haven't met the majority of my phone clients. My client base has come from word of mouth, my Psychic Development classes and radio shows that I've been a guest on.

If you were given one million dollars, what is the first thing you would do? I was a millionaire and shopaholic. When I divorced, my husband had hidden everything in offshore accounts. After two years of legal fees and court dates I walked away from it all. It was better to put my energy into myself. If I had it again, I would use it more for basic necessities that my children have had to do without.

If you weren't in your current job, what would you be doing? Join the Peace Corps and help Third World countries. I can't imagine not using my psychic ability, it's my life.

What is your key to happiness? Being of service to others by using my psychic abilities. It gives me a chance to get out of myself.

Any love advice? Set a standard and don't lower it. Do not get physically involved with anyone until you see if they walk their talk.

Motto? Be afraid and go for it anyway.

How do you make your predictions? I tune something in by asking a question in my head, then I get an answer. I follow it like a calendar. I see things as if I'm watching a movie with the thoughts, feelings, and visual of the people I am tuning in. I get things in detail.

What was your position on the O.J. case? I think he is guilty. For 12 weeks I gave a psychic perspective on a weekly basis on the case for a national tabloid.

Do you look at cases as they surface, such as the Jon Benet case? Usually when I'm done with clients for the day, I spend time with their kids. I try to give back my gift by doing some gratis work. I have volunteered some time with Search and Rescue and worked on a couple of murder cases with the police. I have spoken at the SYDS Foundation and grieving groups to help people find closure for the loss of loved ones. I am a great medium.

What are your thoughts on bin Laden? He's not the top man, he's merely a scapegoat. I believe he is part of a larger organization.

Have you seen terrorism coming? Honestly, I predicted it, but I was off on the timing. I thought it would occur a year ago and didn't expect it would happen in this way. In fact, last year I took precautions by purchasing survival gear.

Any global predictions? Because of what's going on with the Euro, I thought I'd see if our currency is going to change. In either 2003 or 2004 we're going to have a change in currency. I had a dream about getting money out of the bank. Next, I think we're going to have a stock market crash at the end of spring or the beginning of summer this year. The market has not bottomed out but it will. I think Usama bin Laden will be found in February or March of this year. Sometime in the spring Yasser Arafat will no longer be leader of the Palestinian Authority. I believe there's going to be a major earthquake in February 2002 but I can't pinpoint it. This February there will be more terrorist attacks in the U.S. and in fall 2002. Finally, I think the U.S. will be at war - full scale war - and it may take place from here - maybe this summer or the following summer. There will be an assassination attempt on George Bush in May or June of 2002.
